

please increase and improve the captioning on all tv programing and at movie theaters. Tonight, I watched and paid for a movie that I could only understand half of. At night I recieve no captioning on my tv, and in my area I can't pay to see a captioned movie. I don't know how many movies I have walked out of just because I couldn't hear them, or the assistive listening devices failed to operate in an effective manner. Please, let everyone with hearing disabilities have full and coherant access of the movies, the tv, the phone, the news, and make this a 24 hour thing. Force the movie industry and the tv broadcasters to provide this service by law at no cost to the government 24-7. It can't cost that much to add voice recognition software on to a recorded program

Chances are, no matter who you are, by the time you are elderly, you will also experience hearing loss and need captioning. What is done today will likely effect your future and the hearing impaired present. Yes, I address this to the 'you' who is making decisions that may continue to exclude me from the media and telecommunications, or the 'you' which will make a decision to aid and abet my use of these things.
